

GIBRALTAR

“

Gibraltar is a British overseas territory where Casais has been present since 2005 with a consolidated position and where we want to achieve the leadership.

Gibraltar is a British overseas territory where Casais has been present since 2005 with a consolidated position and where we want to achieve the leadership, both by the increasing involvement in the vast development program launched by the local Government, as well as by the confidence that private investors are depositing on our operational capacity.

We highlight having obtained the Recognition of the Governor of Gibraltar for the work carried out in the territory, and having been awarded the Heritage Award for the participation and sponsorship in the recovery and replacement of an old cannon located in the well-known Fort "Harding's Battery".

This recognition was reinforced with the confidence of the Government of Gibraltar with the awarding of the contract for the controlled cost Housing Project that represents half of their electoral commitment.

We have a team consisting of almost 450 employees, with five dozen local workers, forming a solid and motivated group ready to face the present and future challenges.

We highlight some recent works developed in Gibraltar: University of Gibraltar, Holiday Inn Express Hotel, Kings Warf (two last towers) and Waterport Schools Project.
