

FRANCE

“

The entry of the Casais Group in the French market took place in the end of 2011 through RMCasais - a company which results from the partnership between Carpincasais and Socimorcasal.

A year later, RMCasais secured a contract in Switzerland, but it has now been in Paris, where it has carried out most of the work in the most emblematic buildings of the city. Several works are also in progress for large construction groups in France: Head offices for companies, houses and hotels. We specifically specialize in solutions for joinery, coatings and pavements, but we also provide coatings in plasterboard.

We currently have a fighting team in this "fierce" market. Employees who know that everything depends on them for our success and who have overcome many barriers due to the commitment and quality of work performed.
