

# PORTUGAL

“

*May 1958, Braga. A Construction and Public Works business group. These are our roots that we still maintain today and which we are proud of.*

**H**eadquarters with Central Yard in Braga. A logistics centre for all the Group companies in the various areas of business. A delegation in Lisbon and an extremely wide and diversified portfolio of infrastructures built on the Mainland and Islands.

This is where the teams who represent us in the 12 international markets where we operate departed from 20 years ago. Here lies an entire multifaceted back office structure which, by leveraging synergies and knowledge, provides constant support to all business across the board.

In Portugal, the construction and rehabilitation of buildings continue to be our strongest bets, but we have been increasingly recognized for the success of our internationalization process, which currently represents about 80% of our global turnover.

We have a team consisting of about 600 employees, which is distinguished for its integrity, knowledge, discipline, cooperation, determination, flexibility, dedication and humanism. We are guided by our vision: to be a reference of knowledge and solidity in engineering and construction.

The integrated offer we provide is our virtue;

Doing well is our mission;

To take our competence to the four corners of the world is our challenge and our opportunity.
