

# BELGIUM

“

*October 2001. CNT was the first company of the group to reach Belgium.*

**C**urrently, the success of this market is shared with the activity of Carpincasais and Socimorcasal, as is the head office, located in Zaventem.

In the Belgian market, we work with large construction and engineering companies for internationally recognized clients. The Safety and Quality requirements are at a high level, boosting the high technical training and expertise of our staff. We hold an annual Safety meeting for all employees. Demonstrating that this is a "safe" bet are the first places obtained in the rankings of the work performed in the construction of the new NATO headquarters.

The construction of reinforced concrete structures is our specialty, but we executed diversified jobs including major renovations. The most recent contracts awarded demonstrate that we have the confidence of business owners and of general contractors in this market. This is only possible with the commitment, determination and quality of our teams.
