

## BRAZIL

“

*The approach to the American continent emerged at the end of 2010 through Brazil.*

**W**e started with some contracts in the region of Rio Grande do Norte and in Bahia. We later carried out rehabilitation works of hotel units and other service buildings.

Expectations in relation to the Brazilian market are high, taking into account the wide range of opportunities in the areas of rehabilitation and building that we have been doing in the State of Rio de Janeiro.

With Headquarters in Rio de Janeiro, we are a team consisting of nearly thirty employees, of which 17 are Brazilians.

We named 2014... an Intense Year! And it was in fact that, as the results achieved were only possible due to the quality and commitment of the team, to the articulation and collaboration with clients and suppliers. Intensity which did not hinder, but rather significantly benefited to strengthen the internal cohesion of Casais Brazil, an essential condition for us to successfully tackle the huge challenges the company has ahead.
