

CASAIS IN THE WORLD

A well-structured internationalization process has been the key to CASAIS' business development.

Our almost 60 years of business activity have been based upon constantly reaffirming our founding principles underlying the success of CASAIS' projects over time and in various fields of activity – special works, public, industrial and sporting buildings, hotel and residential buildings amongst others - using rational, client orientated management.

Our well-structured internationalization process has been the key to CASAIS' business development. Our international expansion began in **Germany**, in 1994, and the in **Angola**, 1999, based on adaptation to the local culture and privileging strategic partnerships in order to achieve a solid presence. Our international activities now also extend to **Belgium, Gibraltar, Netherlands, Morocco, Mozambique, Brazil** and, since 2012, to **Qatar, Algeria and France**. More recently we took the first steps into **United Kingdom, Spain and United Arab Emirates**.

Each new market is viewed as an ambitious project with specific characteristics and requirements and a new source of motivation and improvement.
