

EXCELLENCE IN PARTNERSHIPS

In our Mission we assume to "manage with mastery and innovation promoting strategic partnerships and new markets based on a culture of excellence and sustainability"

The results show that we have managed to keep the loyalty of clients and business partners based on a relationship of trust on our expertise, competence and responsiveness.

Our international activity is increasingly gaining size and weight in the Group's turnover. In this bet, we have also managed to boost the growth and enlargement of business of several associated companies and various subcontractors and business partners in projects that we take on in the various markets in which we operate, thus contributing to the joint success.

We have several partnerships with holdings in companies with activities deriving from and adjacent to our core, construction: waste management, environment, electrical, hydraulic and mechanical installations, concrete and pre-manufactured concrete elements and construction materials.

Our base structure, with headquarters in Portugal, is highly specialized and provides support to all national and international activities in terms of logistics, export, procurement, information systems, financial and legal services, human resources and communication.
