

“

In the retail segment, our challenge are projects with capacity of being major stimulators of the regions' economy

In the national and international real estate we bet in medium sized **housing projects** in the centre of cities (Lisbon), targeting niche markets and preferably with business partners (landowners).

In the **retail** segment, our challenge are projects with capacity of being major stimulators of the regions' economy due to the jobs created, the increasing of the visitors to the cities and of the local commerce, such as [Algarve Outlet](#), in Olhão, Portugal, and [Lobito Retail Park](#) in Angola.

In the **tourism** sector, venues such as the hotel [Monte Prado Minho](#), in Melgaço, Portugal, are references to new hostelry projects.
