

HOMING HOMES

The evolution of the concept of housing

A direct impact that transcends the individual economy.

Homing aims to accelerate the transition to a sustainable living, through the creation of housing solutions with optimization of resources and improvement of quality of life in interior spaces. In this sense, Homing defined a complete process that analyses the building, whether in the initial phase, in an execution project or already in operation. The technological solutions are chosen based on fundamental assumptions of sufficiency and energy efficiency, in this order, Homing being agnostic about suppliers and solutions technologies. ***The future is not something we enter. The future is something we create.***
