

CASAIS GROUP IS PART OF THE BCSD PORTUGUESE NETWORK

At the beginning of the year, we communicated and disseminated the Sustainable Development Goals (SDGs) that we consider strategic for our organization and our business.

At the same time, we decided that it would be an important step to formalize our membership of a national and international organization with specific programs and guidelines for Sustainable Development.

In this regard, we moved forward with joining the Business Council for Sustainable Development (BCSD) in January.

[BCSD Portugal](#) is a non-profit association that aggregates and represents more than 100 leading companies in Portugal, which are actively committed to the transition to sustainability. Its mission is to help member companies on the journey to sustainability, promoting a positive impact for stakeholders, society and the environment.

They have a wide sector representation and companies of different dimensions, from those that integrate the stock index PSI20 to others of smaller dimension, and the sales volume of the associates represents about 10% of the national GDP.

Soon we will have more information about the projects and initiatives developed in this area, as well as news about the implementation of the quest for the sustainability of Casais. However, you can check for additional information about BCSD Portugal [HERE](#).
