

Quadrina attracts new clientes and supplies distribution panels to Gibraltar

11.02.2019

Quadrina started 2019 on the right foot and has just won two more new clients: SOMA, for which it made an electric panel, a right and left command, and Prime Energy, with the execution of an electric panel for protection of a photovoltaic installation. The company also carried out, for the first time, the export of eight portable switchboards to a customer in Gibraltar. This new partnership is part of the strategy of internationalization of the company and, therefore, is assumed as another important step for the success and consolidation of the company in the market.
