Ampere Energy Portugal promotes technical and comercial training

19.03.2020

In a technical-commercial session, Ampere Energy Portugal presented the novelties 2020, of which we highlight the innovative PRO range, the long-awaited three-phase battery and the charger for electric vehicles. Still in the commercial field, the resale conditions 2020, the Ampere online simulator and the most used commercial arguments were addressed. The session ended with a demonstration of installing an Ampere Square S battery on the spot, where it was possible to clear any and all doubts and technical curiosities.
